Quantum3D Delivers IDX Image Generation Systems to Lockheed Martin Aeronautics in support of the F-16 Israeli Training Program

SAN JOSE, CA—October 23, 2009 – Quantum3D, Inc., a leading provider of Commercial-off-the-Shelf (COTS) real-time visual computing solutions, announced today that they fulfilled the delivery of an IDX Series Image Generation systems, with training, to Lockheed Martin Aeronautics as part of Quantum3D's and Lockheed Martin's continued support of the Israeli F-16 Simulator Training Program.

The recent Foreign Military Sale demonstrates Quantum3D's consistency and commitment to the visual simulation market space. Lockheed Martin recommended the IDX Series for the F-16 Israeli Program based on their use and success with Quantum3D's F-22 and F-35

flight simulator packages. "We have enjoyed a long-standing and mutually rewarding relationship with Lockheed Martin Aeronautics, working

on F-22 and F-35 flight test programs," said Brian Overy, Quantum3D's VP of Business Development. "The fact that Lockheed Martin recommended our product for the F-16 Israeli Program is a compliment to our commitment to provide the highest quality Image Generators for the Fast Jet Market."

About Independence IDX Series Image Generator

The top-of-the-line Image Generator (IG), the IDX Series is ideally suited for a wide range of mission-critical military and civilian applications that require synthetic environment simulation, training, or mission rehearsal. COTS and open architecture, the Independence line of image generators enables rapid deployment for a wide variety of simulation and training applications. It is perfect for fixed- and rotary-wing aviation simulation and training; FAA Level-D full-flight simulators; weapons systems and gunnery training; hardware-in-the-loop sensor simulation; automotive research & development simulation and driver training; military ground vehicle training; fixed-base and forward air traffic control simulation and training; ship's bridge simulation and training; and mono & stereo scientific visualization and virtual reality.

About Quantum3D

Quantum3D, Inc. is a leading developer and manufacturer of Commercial-off-the-Shelf (COTS), open-architecture, real-time visual computing solutions. Quantum3D combines the most advanced hardware and software systems for graphics simulation in a variety of markets and implementations—image generation; tactical computing for avionics; vehicle and man-wearable applications; synthetic environments; graphics subsystems; and other COTS solutions. Quantum3D is a privately-held company headquartered in San Jose, California. For more information about Quantum3D real-time visual computing solutions, please visit www.quantum3d.com.
