## Quantum3D Delivers IDX in Support of Embraer's Colombian Super Tucano Training Program

*Quantum3D's Top-of-the-Line Independence™ Image Generator uses COTS Technology to Provide Support to the Embraer Colombian Super Tucano Training Program*

**SAN JOSE, CA–November 6, 2009 – Quantum3D, Inc.**, a leading provider of Commercial-off-the-Shelf (COTS) real-time visual computing solutions, announced today that they fulfilled the delivery of an IDX Series Image Generation system and Databases to Embraer as part of Quantum3D's and Embraer's continued support of the Super Tucano Training Program.

This most recent sale delivered to the Colombian Air Force allow pilots to train for internal security and border patrol missions and further demonstrates Quantum3D's consistency and continued commitment to the visual simulation market space. Embraer selected the IDX Series and Databases for the

Columbian Super Tucano Program based on the exceptional price vs. performance value. "We welcomed the opportunity to work with Embraer on this, the first of many, Super Tucano Programs," said Brian Overy, Quantum3D's VP of Sales and Business Development. "We anticipate forging a long standing relationship with Embraer and working together on many more Super Tucano Programs in the future."

### **About Independence IDX Series Image Generator**

The top-of-the-line Image Generator (IG), the IDX Series is ideally suited for a wide range of mission-critical military and civilian applications that require synthetic environment simulation, training, or mission rehearsal. COTS and open architecture, the Independence line of image generators enables rapid deployment for a wide variety of simulation and training applications. It is perfect for fixed-wing and rotary-wing aviation simulation and training; FAA Level-D full-flight simulators; weapons systems and gunnery training; hardware-in-the-loop sensor simulation; automotive research & development simulation and driver training; military ground vehicle training; fixed-base and forward air traffic control simulation and training; ship's bridge simulation and training; and mono & stereo scientific visualization and virtual reality.

### **About Quantum3D**

Quantum3D, Inc. is a leading developer and manufacturer of Commercial-off-the-Shelf (COTS), open-architecture, real-time visual computing solutions. Quantum3D combines the most advanced hardware and software systems for graphics simulation in a variety of markets and implementations—image generation; tactical computing for avionics; vehicle and man-wearable applications; synthetic environments; graphics subsystems; and other COTS solutions. Quantum3D is a privately-held company headquartered in San Jose, California. For more information about Quantum3D real-time visual computing solutions, please visit [www.quantum3d.com](http://www.quantum3d.com).
